SHUTTERS HARDWARE | DOOR HANDLES | FURNITURE FITTING

made in italy / US based company

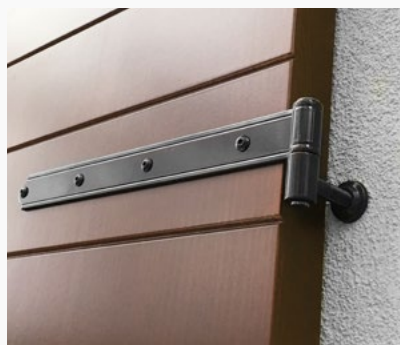

didieffe USA

With its production facility located in North-West Italy, Didieffe is a company strongly rooted in its territory. From its place of origin, in the heart of the Dolomites, it has inherited the passion for the handcrafted excellence of small workshops, of blacksmiths and carpenters, but has managed to bring it up to date from an industrial viewpoint, automating the processes of product development without forfeiting typical Italian creativity. This is the spirit that it has exported to the States, where the company now owns a well-stocked warehouse and a commercial office to serve its clientele. During these years, the company has adapted its products to the needs of the American market and today the range of products covers all the requirements of this territory.

SHUTTERS HARDWARE

To the United States territory we bring all the experience in the production of hardware for shutters, which has centuries of tradition in Europe, knowing how to adapt it to the needs of local manufacturers. Hinges with "T" or "L" shape, pintels of every type with different offsets to adapt to all types of shutter, this is the vast product range that we propose today and are continuing to develop thanks to suggestions received from our American customers.

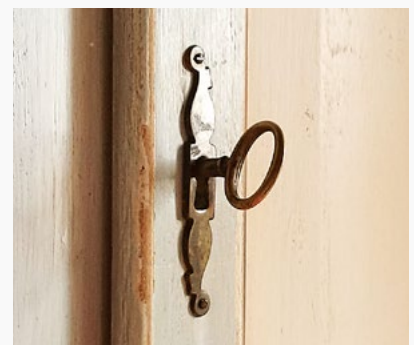

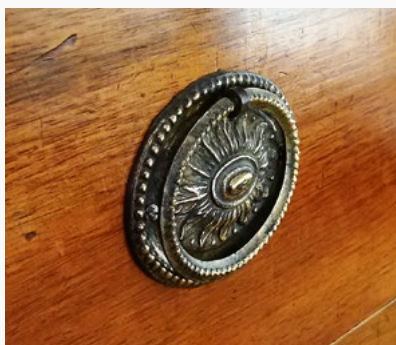

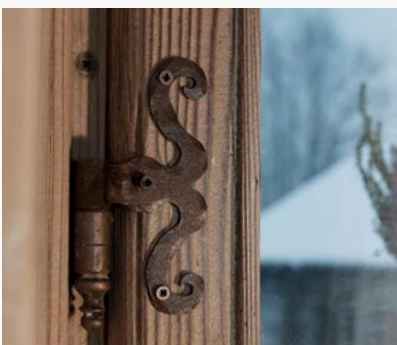

DOOR HANDLES

Just like the hardware for shutters, wrought iron and brass handles are the result of the skill of our master blacksmiths. Products of superior quality, manufactured with techniques handed down by our ancestors, who were already working with metal in our territories at the dawn of history. Our handles do not open only the doors of our homes, but also a panorama of the thousands of years of history of this handicraft tradition.

FURNITURES FITTINGS

With us, everything is in harmony. The right accessory fitted on the furniture in our home is a fundamental requirement for achieving harmony in the furnishing concept. So also these accessories are made according to criteria of elegance and style, with top quality materials that combine well with the fine woods of the best furniture.
